Team: SMS

Heading Sprint 1 report, updated

Overall meetings and comments:
In the first meeting, we discussed the overall design of the product, agreed what to be done for the project.
In the next several meetings, we encountered some issues toward the implementations of specific functions but we were able to fix them.
By using Slack and Github, we were able to communicate virtually and turn in our work on time.

What was done?
The simple user interface was established, and was able to use.
Basic functions are implemented: CPU, memory, network, and disk
Basically we achieved all our goals in sprint1.

Suggestions, actions start doing:
More scrum reports, organize things in a better way

Work completion rate:
total number of user stories completed: 2
Total number of estimated ideal work hours completed during the prior sprint: 11 hours
Actual number of work: 11 hours

Burndown Chart:
